Target Audience:

The target audience for this program is advanced practice nurses seeking to increase their knowledge of pediatric endocrinology.

Program Goal:

The goal of the program is to provide specialty content in pediatric endocrinology for advanced practice nurses across the country as a means to increase the number of qualified providers in the area of pediatric endocrinology.

Objectives:

1. Discuss the role of the hypothalamic-pituitary axis in the regulation of hormones influencing growth, metabolism, puberty, and bone mineral health.
2. Identify common pediatric endocrine disorders, their clinical presentation, and their impact on growth and metabolism.
3. Describe appropriate evaluation and management of common pediatric endocrine disorders affecting growth, puberty, thyroid function, adrenal function, sexual differentiation, glucose metabolism, and bone mineral health.
4. Explain the genetic and molecular basis of common pediatric endocrine disorders.
5. Describe the role of the advanced practice nurse in the care of children with pediatric endocrine disorders.

Continuing Education Fee: \$1000.00

21.7 Nursing Contact Hours

The accreditation period for this material is 2 years from the publication date. No contact hours will be awarded after the expiration date of February 25, 2010.

Registration and Cancellations and Substitutions:

Payment is requested at time of registration. Please note that if you don't complete the program, you are still responsible for payment. Vanderbilt University School of Nursing (VUSN) reserves the right to cancel this offering for due cause, in which case, tuition will be refunded in full. VUSN is not responsible for any of the expenses incurred by the participant due to cancellation.
